The Diesel and Heavy Equipment Mechanics program prepares students for a career as a Diesel Mechanic. A Diesel Mechanic may choose from a variety of work settings. Industries that hire Diesel Mechanics include mining, logging, power generation, railroad, farming, heavy trucking, off-road vehicles and large ships. Upon completing the program students may specialize as a warranty diesel mechanic for specific companies or truck specific companies such as Kenworth or Peterbuilt. Other options of employment include self-employment, part sales, equipment and truck sales, and shop foreman. 90% of USU Eastern students are able to obtain related employment while completing their program.
