Participants of the Machine Tool Technology program are prepared to obtain an entry level job in the manufacturing industry. They also have the option to transfer to a four year institution to obtain more training which will help with advancement in the manufacturing field.

The job outlook for the machining profession is as follows:
A survey of U.S. manufacturing employers found that 80 percent of respondents said they had a serious problem finding qualified candidates for the highly technical world of modern manufacturing.

Machining has been selected as one of Utah’s five-star occupations. Business growth, as well as retiring workers, will provide the majority of new job openings and with a projected 28 percent increase in machinists over the next decade, the machining occupations will grow faster than average.
